

I started my training in Egypt and obtained an MSc in Psychiatry and Neurology from Cairo University, Egypt. I then moved to the UK where I finished my basic psychiatric training and attained membership of the Royal College of Psychiatrists. I proceeded to do fellowships (specialist training) in Geriatric Psychiatry, General Adult & Community Psychiatry as well as Neuropsychiatry. I worked as a geriatric psychiatry consultant in Warwickshire, UK.

I have been working in Nova Scotia since 2009 as an Assistant Professor, Dalhousie University and Staff psychiatrist in Geriatric Psychiatry. I have an interest in neuromodulation and am part of the Neuromodulation service. I am one of the founders of the Atlantic Neuromodulation Solutions & Rehabilitation (ANSR) clinic; currently the only rTMS clinic east of Montreal.

I supervise residents and fellows as part of my educational commitments which also include membership of the organizing committee of the specialist training program.
